Creating perfection

ONE PIECE

At a Time

When you look at furniture as a work of art, you know not to compromise. Then be it starting from the very first place to the final polished product. This is the reason why we start the cycle of no compromise, right from the scratch.

Sangam plus Plywood India's largest wood panel is committed to bring the most advanced product across its portfolio cater to the rapidly evolving needs of India's interior industry.

From leading architects interior designers, dealers and to your trusted wood contractors our products are a trusted choice for everyone.

State-of-the-art
manufacturing facility

-Quadra Pro

Handy Guide to

Traditional, Plywood is made from several layers of alternating veneers glued together and subjected to high pressure and temperature in hot press. The India this method of manufacturing is being practiced for year now. leading to one major drawback the lack of standardization. The revolutionary Qudrara Pro Technology ensures a superior end product with no blisters, de-lamination or wrapping. the manufacturing subject veneer to a seres of processes that guarantee the perfect of plywood.

Technology-

Quadra pro Technology...

QUADRA PRO TECHNOLOGY

Makes sure that you trust our plywood because

It removes defects from the plywood core making it error-free

It's multi-step calibration guarantees uniform thickness.

our unique
&
SUPERSTRONG
ADHESIVE
Holding your furniture and your trust strong

Specially formulated
with low formaldehyde content
Phenol Formaldehyde resin is used for the adhesive.
The resin cures at an elevated temperature and makes sure
the bonds between wood veneer layers are boiling
water and weather proof. Resin that's set properly does not disintegrate
under the influence of heat or moisture ensuring minimal emission of
formaldehyde from the cured adhesive, Preservative chemical are added in
the process through **CCB** treatment which eradicates borer and termites
sure that the whole panel is protected from wood destroying organisms
both terrestrial and marine all this along
with guaranteed safety
for the user

Our proud p

Moisture Resistant Plywood

100% Gurjan Face
MR Grade Resin with
Melamine Bonding
100% Calibrated
Moisture Resistant
Smooth/Polished Surface

Zero Gap/Overlap
Borer and Fungus Proof
Termite Resistant
warp- Free
Emission Free

Boiling Water Proof Plywood

Boiling Water proof
Balanced Construction
100% Calibrated
Density More Than Average BWP Grade
Smooth Surface And Edge Finish

Zero Gap/Overlap
Borer and Fungus Proof
Termite Resistant
warp- Free
Emission Free

**SHUTTERING
PLYWOOD**

Blockboards

Moisture Resistant Blockboard

Made with Eco-friendly Wood Species
Bonded with Melamine Urea Formaldehyde Resin
Moisture resistant
Dimensionally Stable
Wrap-Free
Borer and Termite Resistant
No Undulations

Boiling Water Proof Blockboard

Made with Eco-friendly Wood Species
Bonded with phenol Formaldehyde Resin
Boiling Water Proof
Borer and Termite Resistant
No Undulations

The Blockboard advantage

The unique Quadra Pro Technology of Sangam Ply ensures superior quality Blockboard, which are ideal for all weather condition and application. The Sangam Blockboards. are made with hardware/pine filler which are uniform in dimension and individually treated with preservative which makes it most durable and strong

OUR PRODUCTS FIND A SPOT ALL AROUND

INTERIOR

Any kind of indoor furniture like kitchen cabinets, office furniture, wall panels, load-bearing tops fencing, partitions, floorings, boxes, ceiling, temporary construction for melas and exhibitions, platforms etc.

EXTERIOR

Hoarding and display boards, shuttering, structural components and load-bearing tops and sides, Even for marine ship boards bus and truck bodies and flooring for chemicals for any kind of decoration

A Trusted
Choice
Rightly So

...standards are higher than the requirements of the static bending properties MOR and MOE indicating best in class bond quality, than six cycle of boiling and drying. Sangam plus plywood can stand more grades of plywood international standards for different requirements of many national and Sangam plus plywood proudly provide

Watching our Carbon Footprints

Sangam plus plywood strives to adopt the best eco-friendly practices across its operations, we are led by the commitments to utilize the scarce environmental resources most optimally, sangam plus plywood does not use the timber from natural forest and instead sources it from agroforestry plantation the chain of custody while procuring raw material is strictly monitored so that the product can be marked gracefully with eco-friendly loading.
